Geneva Park District Use of Pesticides

The Geneva Park District ensures safe practices throughout its parks, facilities and programs. Our staff are extensively trained to handle, store and apply pesticides throughout our parks.

The products the Geneva Park District approves for use throughout our parks contain the same ingredients found in lawn care products that tens of millions of homeowners buy annually at lawn and garden stores. These products are applied safely according to federal, state and local regulations.

Additional health and safety information can be found online through the National Pesticide Information Center, [http://npic.orst.edu/](http://npic.orst.edu/)
